

Sepcon

**Integrated Construction
Solutions**

Our company

Sepcon was founded in the year 2002, specializing in construction and maintenance of civil works, electromechanical assemblies and pipelines; characterized by EPC integral projects and those of complex logistics. Our main focus is in the industry of hydrocarbons, mining and energy; having a presence in countries such as Peru, Bolivia and Argentina.

Mission

Provide a specialized service in the execution of projects; through high management standards, state-of-the-art technology and qualified personnel for the hydrocarbon, energy and mining industries. Creating value for our shareholders and clients; providing development opportunities to our employees; unconditionally ensuring the quality, safety, health and sustainability of our projects as well as public interest; respecting and preserving the environment.

Vision

To be recognized in the Latin American market as a leading and reliable company in the development of projects; able to rapidly respond to the demands of its customers, exceeding their expectations.
